The image shows a sheet of graph paper with a grid of small squares. A thick red line runs horizontally across the top, approximately one-third of the way down from the top edge. Below this line, there are several vertical red lines that divide the page into columns. There are four vertical red lines, creating five columns of varying widths. The top portion of the page, above the first horizontal red line, contains faint, illegible green markings that appear to be bleed-through from the reverse side of the paper. The rest of the page is blank grid paper.
